# School Breakfast Program (SBP) Overview

This chapter discusses the School Breakfast Program including methods of service, menu planning options, and menu requirements.

The School Breakfast Program is a Federal entitlement program that provides states with cash assistance for non-profit breakfast programs in schools and residential child care institutions (RCCI's).

- Public schools or non-profit private schools of high school grade or under, and RCCI's are eligible to participate in the Breakfast Program.
- Regulations require that all meals meet the recommendations of the Dietary Guidelines for Americans. In addition, breakfasts must provide one-fourth of the daily recommended levels for protein, calcium, iron, Vitamin A, Vitamin C and calories.
- Participating sponsors must serve breakfasts that meet federal nutrition standards and must provide free and reduced-price breakfasts to eligible children.
- Sponsors may charge no more than 30 cents for a reduced-price breakfast. Sponsors set their own prices for breakfasts served to residents who pay the full meal price (paid), though they must operate their meal services as non-profit programs.

#### Severe Need

Sponsors may qualify for higher "severe need" reimbursements if 40% or more of their lunches in the second preceding year are served free or at a reduced price. Severe need payments are at a higher rate than the normal reimbursements for free and reduced-price breakfasts.

#### **Breakfast Service Methods**

As competition for school meals increases, methods for serving meals may need to be revamped. Whether starting or expanding a breakfast program, attracting residents may be as easy as creating or changing school breakfast options. An alternative breakfast service method is outlined below:

Grab	'n' Go Breakfast:
	Convenient, usually take less time to prepare than most
	traditional breakfast meals.
	Residents do not have to wait to get their food.
	Residents can eat on the go, during break, or during 1st period
	Works well with high school students/residents who have busy
	schedules.

# **Menu Planning Options**

Each sponsor must select a Menu Planning System for use in its Child Nutrition Program. Sponsors can choose a Food Based Menu Planning System, Nutrient Standard Menu Planning System or Assisted Nutrient Standard Menu Planning System. Sponsors are allowed to use one menu planning system at breakfast and a different one at lunch. Refer to Chapter 3, Menu Planning Methods to Meet Nutrient Standards.

# Food Based Menu Planning – without Offer versus Serve (OVS)

The School Breakfast Pattern requires that four components be offered. In schools not implementing Offer vs Serve (OVS), a student must take full portions of all 4 components offered. Each breakfast menu offered and claimed for reimbursement must conform to one of three menu combinations. These combinations are shown below.

Combination 1	OR	Combination 2	OR	Combination 3
8 fl. oz. Milk ½ cup Juice*/Fruit/		8 fl. oz. Milk ½ cup Juice*/Fruit/		8 fl. oz. Milk ½ cup Juice*/Fruit/
Vegetable		Vegetable		Vegetable
2 Grains/Bread		2 oz. Meat/Meat Alt.		1Grains/Bread
				1 oz. Meat/Meat Alt.

# Food Based Menu Planning – with Offer versus Serve (OVS)

In RCCIs implementing Offer versus Serve, residents are allowed to refuse any one component that they do not intend to eat. The refused component may be any of the 4 components offered to the resident. A resident's decision to accept or refuse one of the 4 components doesn't affect the charge for breakfast

<sup>1</sup>Minimum servings for meat/meat alternate = 0.25 ounce and for grains/breads = 1/4 serving.
<sup>2</sup>Grains/Breads must be enriched or whole-grain or made from enriched or whole-grain flour or maal that may include bran and/or germ.
<sup>3</sup>Alternate protein products must meet requirements in Appendix A of 7 CFR Part 220.
<sup>4</sup>No more than 1 ounce of nuts and/or seeds may be served in any one breakfast.
<sup>5</sup> Nuts and seeds are generally not recommended to be served to children ages 1-3 since they present a choking hazard. If served, nuts and seeds should be finely minced.

From the Food Buying Guide

## **Nutrient Standard and Assisted Nutrient Standard Menu Planning**

Both Nutrient Standard (NSMP) and Assisted NSMP use computerized nutrient analysis of menus as planning tools. When averaged over a school week, this menu analysis must meet the nutrient standards for specific age/grade groups.

Nutrient Standard Menu Planning deals with menu items instead of food components. A minimum of three menu items must be offered. Fluid milk is the only menu item required to be offered.

#### **NSMP Offer versus Serve**

- A minimum of three menu items must be offered: one must be milk.
- Residents must select at least two items.
- Residents may decline a maximum of one item.
- Additional menu items may need to be added in order to meet nutrient standards and/or to increase variety.

## **Age/Grade Groupings**

Age/grade groupings are necessary for developing nutrition standards. You have choices in the School Breakfast Program of age/grade group options:

# Food Based Menu Planning (age/grade groupings)

If you are using the Traditional or Enhanced Food Based system you have the following age/grade options:

Menu planners are encouraged to use smaller age/grade groupings to better meet the nutritional needs of residents.

#### Breakfast

•	Traditional and Enhanced Meal Patterns-established age/grade groups
	□ Ages 1 and 2
	□ Preschool
	☐ Grades K-12
	<ul> <li>Optional Grades 7-12 for Enhanced Food-Based Menu Planning</li> </ul>

### **NSMP System (age/grade groupings)**

If you are using the NSMP system you have the following age/grade options: Menu planners are encouraged to use smaller age/grade groupings to better meet the nutritional needs of residents.

## Breakfast

NSMP and ANSMP – established grade groups

- Preschool
- Grades K-12
- Optional Grades 7-12

# NSMP and ANSMP – established age groups

- Ages 3-6
- Age 7-12
- Ages 11-13
- Ages 14 and above

# **Breakfast Customized Age Groups (Optional for NSMP)**

The option to customize age groups allows the menu planner to develop menus that are more accurately targeted to the nutritional needs of specific groups of residents.
